

Continuing Roofing Education & Workshops

CARLISLE SYNTEC SYSTEMS
C.R.E.W.
CONTINUING ROOFING
EDUCATION & WORKSHOPS

Carlisle believes strongly in the value of education and training and provides many opportunities throughout the year, and across the United States and Canada, for our applicators and other audiences to improve their knowledge of Carlisle's roofing products and systems. We offer a comprehensive training program called C.R.E.W. (Continuing Roofing Education & Workshops) that includes 100- to 500-level courses for new and seasoned applicators.

Visit the www.carlisesyntec.com/Education/Training, email Carlisle's Technical Training Team at traininginfo@carlisleccm.com, or call 717-245-7337 for more information and to schedule a training session.

101

INSULATION 101

This half-day class introduces attendees to Polyisocyanurate insulation products and systems, concentrating on key industry terms and how the products are used. This course is a perfect way for roofing industry newcomers to develop a basic understanding of polyiso and get a hands-on experience.

EPDM, TPO & PVC 101

This one-day class introduces attendees to different roofing membranes and systems, concentrating on what the products are and how they are used. This class is a perfect way for roofing industry newcomers to develop a basic understanding of what Carlisle manufactures.

201

EPDM, TPO & PVC 201

This hands-on class provides attendees with additional knowledge about the details and applications of Carlisle's products and systems. This class is ideal for those who would like a deeper dive into the membrane-specific details and have not attended the contractor training program. As a prerequisite to this class, attendees should have a basic understanding of Carlisle's products, systems, and equipment. Completion of the 101-level class is recommended.

Benefits of a Carlisle Training Course

- » Comprehensive understanding of Carlisle system products and applications
- » Install a roofing system from start to finish under Carlisle supervision
- » Reduced number of RFW (repair for warranty)/punch list items on final inspections
- » Fewer claims on installed roof systems
- » Roofing consultants and specifiers increasingly prefer trained contractors
- » Carlisle's experienced trainers translate complex information in a stimulating, interactive, hands-on learning environment

SPECIALTY & PREMIUM PRODUCTS, NEW PRODUCTS, AND BOOSTING PRODUCTIVITY 301

This class covers premium product lines and provides updates on new products through a combination of classroom time and hands-on demonstrations. Attendees will learn about specialty systems and materials and the labor-saving features of Carlisle's products. Specialty & Premium Products topics include roof gardens, FleeceBACK systems, and metal edging. New Products & Boosting Productivity covers recent product updates and demonstrates these products' productivity-boosting benefits. As a prerequisite to this course, attendees should have a good understanding of Carlisle's basic products, systems, and applications. Completion of the 101- and 201-level classes is recommended.

301

302 – INTRO TO UNDERSTANDING DESIGN CRITERIA (WEBINAR)

This webinar is intended for those looking for an introduction to understanding design fundamentals that may also be interested in attending the 401- and 501- classes. This session is geared towards attendees with a good knowledge of single-ply roofing systems and products, but want to learn more about common roofing installation challenges, performance and code basics. This webinar will also feature newer topic of discussion: resilience. Completion of the 101- to 301-level classes is recommended.

302

UNDERSTANDING DESIGN CRITERIA 401

This advanced class teaches attendees how to apply the performance section of an architectural specification to a warrantable roof assembly. Utilizing web-based tools, attendees will learn how to determine whether a proposed system can meet specific design requirements. System examples will be used to enhance learning through classroom tutorials and testing demonstrations. As a prerequisite to this course, attendees should have advanced knowledge of Carlisle's roofing systems, applications, and warranties. Completion of the 101- to 301-level classes is recommended.

401

INDUSTRY CHALLENGES 501

This advanced class will examine common industry challenges, including the differences in versions of industry standards (ASCE, IBC, IECC, etc.), moisture in concrete, reflectivity, LEED, ES-1, and energy codes. At the end of this class, attendees will have a strong understanding of industry standards and building design science as it relates to single-ply roofing. As a prerequisite to this course, attendees should have advanced knowledge of Carlisle's roofing systems, products, and applications, as well as a basic understanding of design aspects. Completion of the 101- to 401-level classes is recommended.

501

EXPERIENCE THE CARLISLE DIFFERENCE

CARLISLE SYNTEC SYSTEMS TRAINING OPPORTUNITIES

Certification Seminar

Certification Seminar is a prerequisite to becoming a Carlisle Certified Applicator. The class is also open to Carlisle-recognized sales representatives, distributors and manufacturers who would like to gain an overall understanding of roofing installations and best field practices.

Certification Seminar Highlights:

- » 2.5 day training
- » Classroom and hands-on training on how to complete common details including curbs, corners, and roof penetrations
- » Product overview
- » Certificate of Completion

Features:

- » In-depth detail installations
- » Overview of membrane systems
- » Specialty installations and best practices
- » FleeceBACK membranes
- » Induction welding
- » Polyurethane foam adhesives

C.R.E.W. Virtual Training Experience

Carlisle SynTec Systems offers a live-streamed version of its comprehensive Continuing Roofing Education & Workshops training program that includes customized training courses for authorized applicators. The C.R.E.W. Virtual Training Experience includes highly interactive, half-day training sessions with two-way communication between you and Carlisle's Technical Training Team. Please email traininginfo@carlisleccm.com or call 717-245-7337 for more information and to book your virtual training course.

On-Demand Training

Carlisle offers several on-demand training webinars covering a variety of topics. Scan here to view our On-Demand Training Webinars.

Video Hub

Carlisle has several educational videos that include installation instructions for certain systems and details, tutorials for navigating the Carlisle website, what to expect during a rooftop inspection, and more! Scan here to visit our Video Hub.
